## PROJECTS / OPEN-SOURCE

AUTOMATED DOWNLOADING SECTION | [Link](#)

Python

This project was made in python which helps to automate the downloading section to resolve and categories our downloading section with different respective folders for easy access.

This project is mainly focus on taking notes and after taking notes , can save it to the database. we can also delete the notes if we want. Tech Stack for the project is for the frontend I have used Bootstrap and for backend , I have used PHP for database connection by mysqli\_connect, to php my admin through xampp server.

## PLACEMENT MANAGEMENT SYSTEM | [Link](#)

This project is based on cpp i.e, Object Oriented Programming concepts like objects and classes, I have also implemented file handing concepts to read and write .
